

We are looking for a

Mobile App Developer (m/f/d)

Working student

10–20 h/week

German and English required, Arabic a plus

Your tasks:

- Support the development and maintenance of mobile apps for Android and/or iOS
- Implement small features and UI components
- Connect mobile apps to REST APIs and handle JSON data
- Test, debug, and improve existing app functionality
- Work with and extend existing mobile app codebases

What you bring:

- You are currently enrolled in Computer Science, Software Engineering, or a similar field
- You are interested in mobile app development for Android and/or iOS
- You have a basic understanding of programming, APIs, and software development
- You are willing to learn and work with existing codebases
- You are reliable, organized, and self-motivated
- Some experience with Android (Kotlin, Jetpack Compose, Android Studio) and/or iOS (Swift, SwiftUI, Xcode) is a plus
- Nice to have: Your own app projects, GitHub projects, university projects, or experience with Git

What we offer:

- Work that is enjoyable.
- Varied tasks that you can help shape and influence — in a committed and supportive team.
- Personal development and support.
- Our standards:
Flexible working hours and remote work, fair pay, modern work equipment, flat hierarchies, and a positive working atmosphere in an open, family-friendly company culture with strong team spirit.

Want to turn your interest in mobile apps into hands-on professional experience? Then this is your chance.

Please send your application documents, including your earliest possible start date, to m.basaj@5fsoftware.de.
